

# Attention Elk Hunters !!!!

The Kentucky Department of Fish and Wildlife Resources in partnership with the University of Kentucky is currently involved in a long-term research project on adult bull and cow elk. During your elk hunt you may encounter an elk that has a collar and ear tags on it.

## Bull collar and eartags

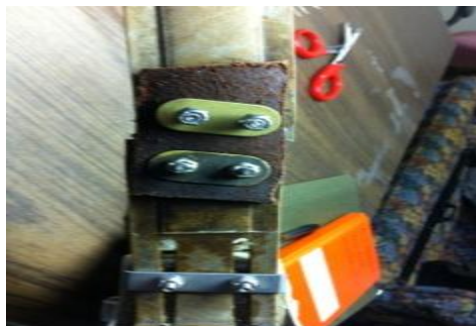

## Cow collar and eartags

**These animals are legal to harvest.** If you were to harvest one please contact the Fish and Wildlife Info Center at 1-800-858-1549. You will need to provide them with the information on where you harvested the animal and a time and place for a KDFWR biologist to collect the collar back from you.

In order to remove the collar, please remove the nuts that hold the collar together or cut the leather spacer in between the 2 sets of bolts and nuts. The bolts and spacer are located on the opposite side of the antenna.

**Thank you for your help and participation. Good luck!**
